Profile

Software Engineering student currently in 6th semester at FAST NUCES, Lahore. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, Software Design, and Database Systems. Experienced in developing academic and full-stack applications using Java, C++, Python, and MERN stack. Currently exploring AI technologies while strengthening problem-solving and core CS concepts.

Education

BS Software Engineering
FAST National University of Computer and Emerging Sciences, Lahore
2023 – Present

Technical Skills

Languages: C++, Java, Python
Web Technologies: MongoDB, Express.js, React.js, Node.js, Vue.js, PHP
Databases: MySQL, MongoDB

Projects

LogiSim Application (Java)

- Developed a desktop application for designing and simulating logical circuits.
- Implemented logic gate operations and circuit validation.
- Designed user-friendly interface using Java Swing.

Cinema Ticket Booking System (Java)

- Built a GUI-based application with seat selection and booking features.
- Implemented booking logic and data storage using file handling.

Online Clothing Store (Vue.js + PHP)

- Developed a full-stack e-commerce web application.
- Implemented product listings, categories, and cart functionality.
- Integrated frontend with backend APIs.

Relief Ledger (MERN Stack)

- Built a web application for managing and tracking relief funds.
- Implemented REST APIs and database integration using MongoDB.
- Designed responsive frontend using React.js.

Alzheimer's Disease Detection (Python, Streamlit, Scikit-learn)

- Developed a machine learning model to predict Alzheimer's disease using clinical dataset features.
- Performed data preprocessing, feature selection, and model training using Scikit-learn.
- Built an interactive web interface using Streamlit for real-time predictions.
